

Dear Sirs, I have been a licensed Radio Amateur for over 38 years. I am greatly concerned about the proposed "Broadband over Power Line" powerline communications concept that has been recently proposed. It would appear that there is a great potential for interference to the High Frequency bands. My particular location would be especially susceptible to this interference, since the back of my property contains three separate powerline easements from three separate utility companies. Please do not allow our HF spectrum to become unusable, ruined by RF radiation from what would become the largest radiating antenna system in the world.

Sincerely, W. J. Engelman
